Q: There are no environmental factors listed and there are no "minimum remedial requirements" in the bid specs. What are we supposed to bid on?

A: As always, the consultant is to take the data and direct a path to closure. Your bid is for the cost to get to closure. Please be aware that this site is intermingled with the "Berlin Hardees" site (#54923-1738-40) across the street. The winning bidder will have submitted the lowest cost to bring each of the sites to closure.

Q: How many wells exist at this site?

A: There are a total of 13 wells monitoring the intermingled plume. The number of wells pertinent to each plume is a matter of conjecture and any reasonable argument will be considered.
